LAMBERT
(the black bale)

PEAT MOSS

FOR ALL ACID LOVING PLANTS

BLENDS:

100% Special Coarse Grade Peat Moss Harvested from the Top of the Peat Bog

SIZE OPTIONS:

3.8 CU FT. (30 per pallet)

Note: This product is compressed, and will expand after packaging is opened.

BENEFITS:

- Naturally Acidic (Low Ph)
- Good air capacity
- Excellent soil conditioner due to the organic content
- In clay soils, peat moss will aggregate soil particles to better aeration and drainage
- In sandy soils, high water-holding capacity will help to retain moisture and nutrients, especially during hot summer months
- Reduces the possibility of erosion
- Sustainability harvested

BEST USE:

Greenhouse, mushroom, nursery product, blueberry farms, and animal bedding. Peat Moss has no pathogens, bugs, bacteria, or weed seeds. Surprisingly you can find it in swampy waterlogged areas primarily located in the Northern Hemisphere - making Peat Moss a delicacy for garden plants. Peat Moss does not compact or breakdown right away, so all you need is one application that will last several years.

APPLICATION USAGE:

(Once Expanded)

3.8 CF will fill 20-40 1 gallon pots or will fill 8-10 gallon pots
